

SCHOOL OF DENTISTRY

Presents Professor Donald A. Falace, DMD

Dr. Falace received the DMD degree from the University of Kentucky College of Dentistry in 1970. He joined the US Public Health Service and was stationed for two years at the National Institute of Mental Health Addiction Research Center in Lexington, KY, where he completed a one year general practice internship and then remained as a staff dentist. He then attended the University of North Carolina at Chapel Hill where he completed a residency in Oral Surgery in 1975. Following residency, he made a career decision not to practice oral surgery but to return to the practice of general dentistry with an emphasis on the medical aspects of dentistry. He joined the faculty of the University of Kentucky College of Dentistry in the Department of Oral Diagnosis and Oral Medicine where he remained for 35 years as Professor and Chief of the Division of Oral Diagnosis, Oral Medicine, and Oral Radiology. He is now Professor Emeritus having retired from the University in July 2010.

Dr. Falace is a Diplomate of both the American Board of Oral Medicine and the American Board of Orofacial Pain. He is a past Director and Examiner for the American Board of Oral Medicine, and until recently, was on the editorial board of the journal "Triple O". In 2007, he was awarded Fellowship in Dental Surgery of the Royal College of Surgeons of Edinburgh. He was also the recipient of the 2008 Great Teacher Award from the University of Kentucky. His teaching, research and practice interests have been in the areas of medically compromised patients, orofacial pain, and sleep-related breathing disorders. He is co-author of a widely used textbook, *Dental Management of the Medically Compromised Patient*, now in its 7th edition, and is editor of another text, *Emergency Dental Care: Diagnosis and Management of Urgent Dental Problems*.

Dr Falace was the co-director of the Orofacial Pain Center at the University of Kentucky for several years and has been a member of the attending staff of the Center for the past 28 years. He has been the Dental Consultant for the Sleep Disorders Center at the University of Kentucky Chandler Medical Center and Samaritan Hospital for the past 16 years. He had an intramural private practice limited to the treatment of patients with chronic orofacial pain and of patients with sleep related breathing disorders. Dr. Falace has lectured widely in the United States, Canada, Latin America, and Europe. Following retirement, Dr. Falace has continued writing and lecturing and has maintained a limited private practice.

Professor Donald A. Falace

SCHOOL OF DENTISTRY

THE UNIVERSITY
OF QUEENSLAND
AUSTRALIA

Presents Professor Donald A. Falace, DMD

Day one - Beyond Teeth:

The Convergence of Dentistry and Medicine

Lecture topics:

- An Update on Antibiotic Prophylaxis for Infective Endocarditis and Prosthetic Joints
- Update on Hypertension and Coronary Heart Disease
- Managing Patients Taking Anticoagulants and Antiplatelet Drugs
- Bisphosphonates and Osteonecrosis of the Jaws: Good and Bad to the Bone
- The Dentist's Role in the Treatment of Sleep Apnoea
- Changing Concepts of the Etiology and Treatment of Bruxism
- Orofacial Pain and Temporomandibular Disorders: The Importance of Diagnosis
- Myths and Realities of Aging: Who Are Our Older Patients?

Lecture Objectives:

1. At the completion of the course, participants should:
2. Understand the evidence for or against antibiotic prophylaxis for infective endocarditis and for patients with prosthetic joints
3. Understand how to minimize the risk of providing dental care to patients with a history of coronary artery disease and/or hypertension
4. Understand when to perform surgery on pa-

tients taking antiplatelet drugs or anticoagulants

5. Understand the risk of providing dental treatment for patients who have taken bisphosphonates
6. Understand when and how to treat patients with obstructive sleep apnea
7. Understand the current evidence of the etiology and treatment of bruxism
8. Understand the importance of making a correct diagnosis when treating patients with orofacial

Day two - Dental Sleep Medicine for the Oral Medicine Specialist (OMAA members only)

Course Description:

This one day course will provide the fundamental aspects of sleep disordered breathing, its diagnosis, and treatment by the use of oral appliances. With this information, the oral medicine specialist should be able to incorporate the fabrication of oral appliances for patients with snoring and obstructive sleep apnoea into his/her practice.

Course Outline:

- Understanding normal sleep: physiology of normal sleep, sleep stages, sleep across the age spectrum, function of sleep.
- Overview of sleep disorders: classification of sleep disorders, discussion of selected sleep disorders.
- Sleep disordered breathing: epidemiology and pathophysiology of snoring and obstructive

sleep apnoea, morbidity and mortality of sleep disordered breathing, recognizing obstructive sleep apnoea.

- The polysomnogram: explanation of the various aspects of the report and implications for treatment.
- Treatment options and guidelines for sleep disordered breathing: behavioral modifications, positive airway pressure, upper airway surgery, and oral appliances.
- Oral appliances for treatment of snoring and obstructive sleep apnoea: types and characteristics of common appliances, efficacy, comparison of oral appliances to positive airway pressure and surgery, compliance, side effects and management, predictors of success and failure, and suggested clinical protocol for treating a patient, trouble shooting.
